This 'Change of Scope' consisted of additional requirements to the vans as requested by the field personnel (i.e., decompression capability of altitude chambers, bio-medical leads and harnesses, safety cots, additional oxygen and intercom outlets in the altitude chamber; transport van spotlights, night operation capability incorporating draw drapes, red lights, etc. Additional costs were incurred shipping the vans via rail rather than FOB Buffalo, New York.

The cost breakdowns for the above should be self-explanatory. Contact me for any additional information if required.

Very truly yours,
